Conduction

Training a competitive and in-demand physical education teacher, a coach-teacher in a selected sport, aimed at carrying out educational activities that meet the high civic responsibility of the teacher's status in modern conditions. The development of a graduate's competency model is designed to answer the question of what professional tasks a specialist of a certain degree (position) and profile should be able to solve. The formation of a modern graduate model that meets the needs of stakeholders and all interested parties is the main strategic goal of the Korkyt Ata University and is supported by the necessary human, educational, informational, and material and technical resources for the educational process.

The university implements a targeted personnel policy and systematically improves its material and technical base to ensure high-quality training of undergraduate graduates who are in demand in the labor market.

1. Description of the OP

Young people studying physical education and sports are realizing the opportunity to comprehensively improve the physical qualities inherent in every individual and related to optimal physical development, as well as the parallel development of spiritual and moral qualities that characterize a socially active person. This ensures that every member of society is prepared for productive work and other socially significant activities.

A specialist in this field has a full range of knowledge and skills for working in the field of physical culture. This means that they engage in various activities. All of these activities are aimed at learning how to maximize human potential. In addition, a professional contributes to promoting a healthy lifestyle. They instill in people the values of humanity. Therefore, the educational process requires the mastery of disciplines in various fields, including natural sciences, economics, social sciences, and humanities.

To make a significant contribution to the development of Kazakhstani sports through the development of physical culture and sports at the university in this direction. Physical culture and sports play an important role in the work carried out at the university to foster resilience, patriotism, and love for country among young people. The promotion of university sports has a significant impact on the upbringing of young people.

2. Components of the graduate model of an educational program

The main components of the graduate model of an educational program include information about the goals and objectives, objects of the educational program, types and areas of professional activity, the specialist's competency model, including descriptors, the type of competencies in accordance with the educational program, and the results of the educational program.

2.1 Objectives of the educational program

The main goal of the physical culture and sports system is to educate strong and healthy people who are committed to protecting our country and working creatively. The physical culture system is organized on a state and public basis in preschool institutions, schools, secondary and higher educational institutions, military units, polyclinics, and other state and public institutions. Comprehensive analysis of the stages of formation and development of physical culture and sports at Korkyt Ata Kyzylorda University and promotion of the younger generation; - Determine the university's contribution to the mass participation in physical culture and sports in the republic based on actual data; - Analyze and scientifically substantiate the achievements of graduates of the Department of Physical Culture and Initial Military Training in sports and science.

2.2 Objectives of the educational program
