Introduction

The development of a competence model for a graduate of the OP "Initial military training" is an important condition for the implementation of the main directions of the Bologna process and meets the requirements of the modern labor market. The competence model of a bachelor graduate determines the readiness of a specialist to solve professional problems. The formation of a modern graduate model that meets the needs of all interested parties is a strategic goal of the university and is provided with the necessary resources for the implementation of the educational process (personnel, educational, methodological, informational, logistical support). The University conducts a targeted personnel policy and systematically improves the material and technical base of the Educational institution in order to ensure the quality of training of a bachelor graduate in demand in the labor market.

1. Description of the OP

OP 6B01404 - Initial military training is implemented in order to develop the potential of higher education, taking into account the educational needs and requests of students. The OP includes materials that ensure the quality of training of students and the introduction of appropriate educational technologies in the field of personnel training.

The main idea of the educational program is to implement the process of training specialists in the initial military training of a new generation capable of performing labor functions aimed at teaching and educating students, forming their personality-oriented competencies.

2. THE CONSTITUENT COMPONENTS IN THE FORMATION OF THE GRADUATE MODEL OF THE EDUCATIONAL PROGRAM

The key components of the formation of the graduate Model of the OP include information about the goals and objectives of the educational program, objects, types and directions of professional activity, the competence model of the specialist (Appendix 1), including descriptors, a variety of competencies in accordance with the educational program, the results of training according to the educational program.

2.1 The purpose of the Educational program:

- Training of highly qualified specialists capable of solving the tasks of innovative development of human capital in the field of education by planning, organizing and conducting initial military training, military-patriotic education and civil defense activities in educational institutions of the Republic of Kazakhstan

2.2 The task of the Educational Program:

- to prepare a specialist with knowledge and skills of educational (pedagogical), educational, technological, organizational and managerial activities for their successful application in the field of education, law enforcement agencies and the Armed Forces.

General and professional competencies

Common:

- independently discusses problems, argues conclusions and competently operates with information;
- uses ICT to support and solve problems in professional activities;
- manages and controls the processes of professional activity within the framework of the strategy, policy and goals of the organization;
- uses creativity and initiative in solving professional tasks.

Professional:

- demonstrates the ability to manage the pedagogical process within the framework of functional responsibilities;
- demonstrates the skills and abilities of developing and putting forward various, including alternative, solutions to problems related to teaching activities;
- assumes responsibility for the development of professional knowledge and for the results of professional activity;
- selects effective methods and means of education and upbringing within the framework of the policy of the organization of education;
- adequately evaluates his own training, determines the trajectory of further education, forms his own career system.

2.3 Matrix of correlation of learning outcomes of the educational program with the competencies being formed

LO 1	applies advanced knowledge in the field of pedagogy, management in education and in a special field, effectively used in the process of initial military training
LO 2	It shows a wide range of theoretical and practical knowledge on the theory and technology of the discipline taught, used to achieve the goals of initial military training and military-patriotic education
LO 3	develops and offers various options for solving professional tasks in the field of initial military training and military-patriotic education using theoretical and practical knowledge of the discipline
LO 4	applies practical and theoretical knowledge of the discipline in planning, organizing and conducting initial military training, military-patriotic work and civil defense activities
LO 5	Applies knowledge and teaching methods to effectively teach basic military training
LO 6	applies action skills in standard and non-standard situations arising in the process of initial military training and military-patriotic education
LO 7	applies the knowledge gained through the integration of classical and innovative ideas in education to solve the tasks of initial military training and military-patriotic education
LO 8	demonstrates the ability and willingness to apply the acquired natural science, humanitarian, socio-economic and legal knowledge in practice, in everyday life

2.5. Personal qualities of a specialist in initial military training:

- purposefulness,
- responsibility,
- determination,
- initiative,
- communication skills,
- poise,
- decency,
- integrity,
- honesty,
- self-control,
- independence,
- stress resistance,
- energy,
- enthusiasm.

CONCLUSIONS

During the development of the education system of the Republic of Kazakhstan and the implementation of the updated content of secondary education, the issue of training teachers who are able to think creatively, find non-standard solutions, take initiative and be competitive is relevant. These qualities should be fully possessed by specialists in initial military training. This model of a graduate of the OP "Initial military training" fully meets the criteria of a future teacher.

The main task of the modern education system is to create conditions for high-quality education. In this regard, the implementation of a competence-based approach within the framework of the Bachelor Graduate Model for the educational program "6B01404 - Initial military training" is an important condition for improving the quality of education.

The graduate's competence model
