INTRODUCTION

The development of a graduate's competence model becomes an unconditional condition for the implementation of the main directions of the Bologna process and a requirement of the modern labor market. The graduate's competence model (master's degree) is designed to answer the question of what professional tasks a specialist of a certain rank (position), of a particular profile should be able to solve. The formation of a modern graduate model that meets the needs of stakeholders and all interested parties is the main strategic goal of Korkyt Ata University and is provided with the necessary resources for the educational process, including personnel, educational, methodological, informational and logistical support. The University conducts a targeted personnel policy and systematic improvement of the material and technical base of the university to ensure the quality of training of graduate students in demand in the labor market.

2.5. Personal qualities of a specialist in the educational program 7M04139 – «State and local government»

- purposefulness,
- responsibility,
- determination,
- initiative,
- communication skills,
- poise,
- decency,
- integrity,
- honesty,
- self-control,
- independence,
- stress resistance,
- energy,
- polite,
- patience,
- enthusiasm,
- management skills,
- the ability to motivate a team,
- the ability to develop your networking,
- negotiation skills.

CONCLUSIONS

This graduate model is the methodological basis for the implementation of the technology of the competence approach. It is also important to understand that the formation of these competencies in a graduate is ensured through a certain way organized and implemented educational process. In market conditions, universities are beginning to pay more attention to the quality of graduates: after all, a graduate is exactly the result of university education that enters the labor market. And it has to be competitive. It is in order to prepare graduates in demand on the market that it is necessary to form a comprehensive portrait of him, a certain matrix of characteristics. From understanding the key advantages, characteristics, and competencies of graduates that employers need, it is possible to move on to creating an effective modern university: to form educational programs, create infrastructure, and use new learning formats.
